Russian Public Opinion on the Ukraine War: Perspectives from the American Experience, Cato at Liberty blog, May 26, 2022 [html](#) [pdf](#)

After a rally-round-the flag effect at the outset of the war, a decline of support is to be expected regardless of the effects of media coverage, antiwar demonstrations, censorship and propaganda efforts, or military happenings in the war. This will also result in an increasing willingness to accept failure or even debacle in the war and in a strong inclination not to attempt other such ventures. However, there is an important difference in the experiences, one that is potentially consequential: while the average American remained substantially untouched personally by the wars, that may well not hold for the average Russian.
